THE KING STREET PAVING MATTER. The proposal to tear up the present cobble stone pavement on King street and to put down Belgian block in its place is being considered by a committee appointed at the Opera House meeting, and examinations of the work done in Washington will be made by the gentlemen that have the matter in charge. It is estimated by the public-spirited and careful chairman of the committee on streets that the work, besides that done by the reliberatory constructs. that done by the railway company, will cost the property holders on each side \$6 per front foot. An equal sum from the city treasury will be required, and at this rate some \$56,000 will be raised by a special tax on King street property alone and \$28,000 by general taxes, making altogether \$84,000, a sum very nearly equal to the present entire annual taxes of the city. It is said, however, annual taxes of the city. It is said, however, by some that this estimate is too high and that Belgian block can be laid at \$3 per front foot, and if this be the case the amount mentioned would be reduced 50 per cent.
